To Aaron

Dear Aaron,

When you first told me you were coming to UCLA and said we should hang out and stuff, I didn't think much of it and thought we would probably go our separate ways and never see each other. But I was sooo wrong. My gains mentor. I have you to thank for pushing me out of my comfort zone last year and making me work out with you because 1+ years later it really has made a difference for me. Thanks for finding time to work on committee meeting graphics sometimes; I know you're really busy with last minute pre med classes and being a family head and everyone's go-to driver. I'm thankful for all the KBBQ trips and will really miss them when you're gone. Maybe I'll get a car and be the new guy who drives to KBBQ every week. Let's hang over break!

Your friend,

Jonathan

To Braden

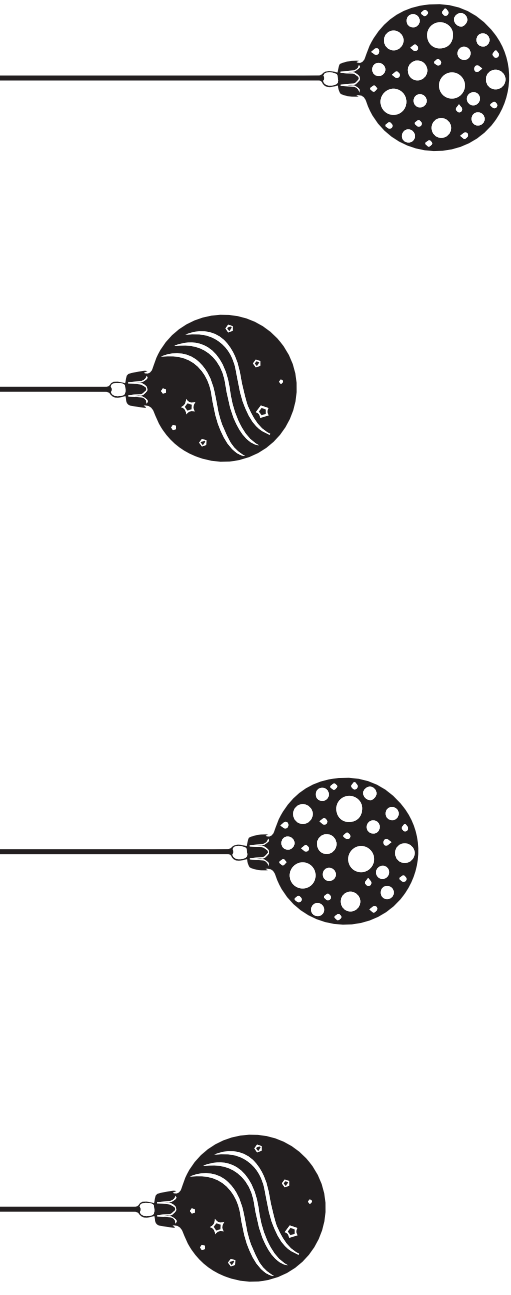

Dear Braden,

It's been quite the adventure being on board with you through lots of hills and valleys (some really bad valleys), but it's always been nice to have someone for support and with an aesthetic eye for feedback. I'm glad to see you're enjoying your time on C&M Committee (I think). GraphTech is the coolest committee because we're both on district committees and have the most subchairs. Sorry if I ever say negative things to you that upset you; I really don't ever mean any of the dumb things I say. We just have one quarter left, and we'll soon find out who our successors are!! I hope we can be friends after the term is over because even though we have a lot of differences, there are still a lot of ways I can relate to you that I can't with most people in Circle K. Have a good break!

To Christopher

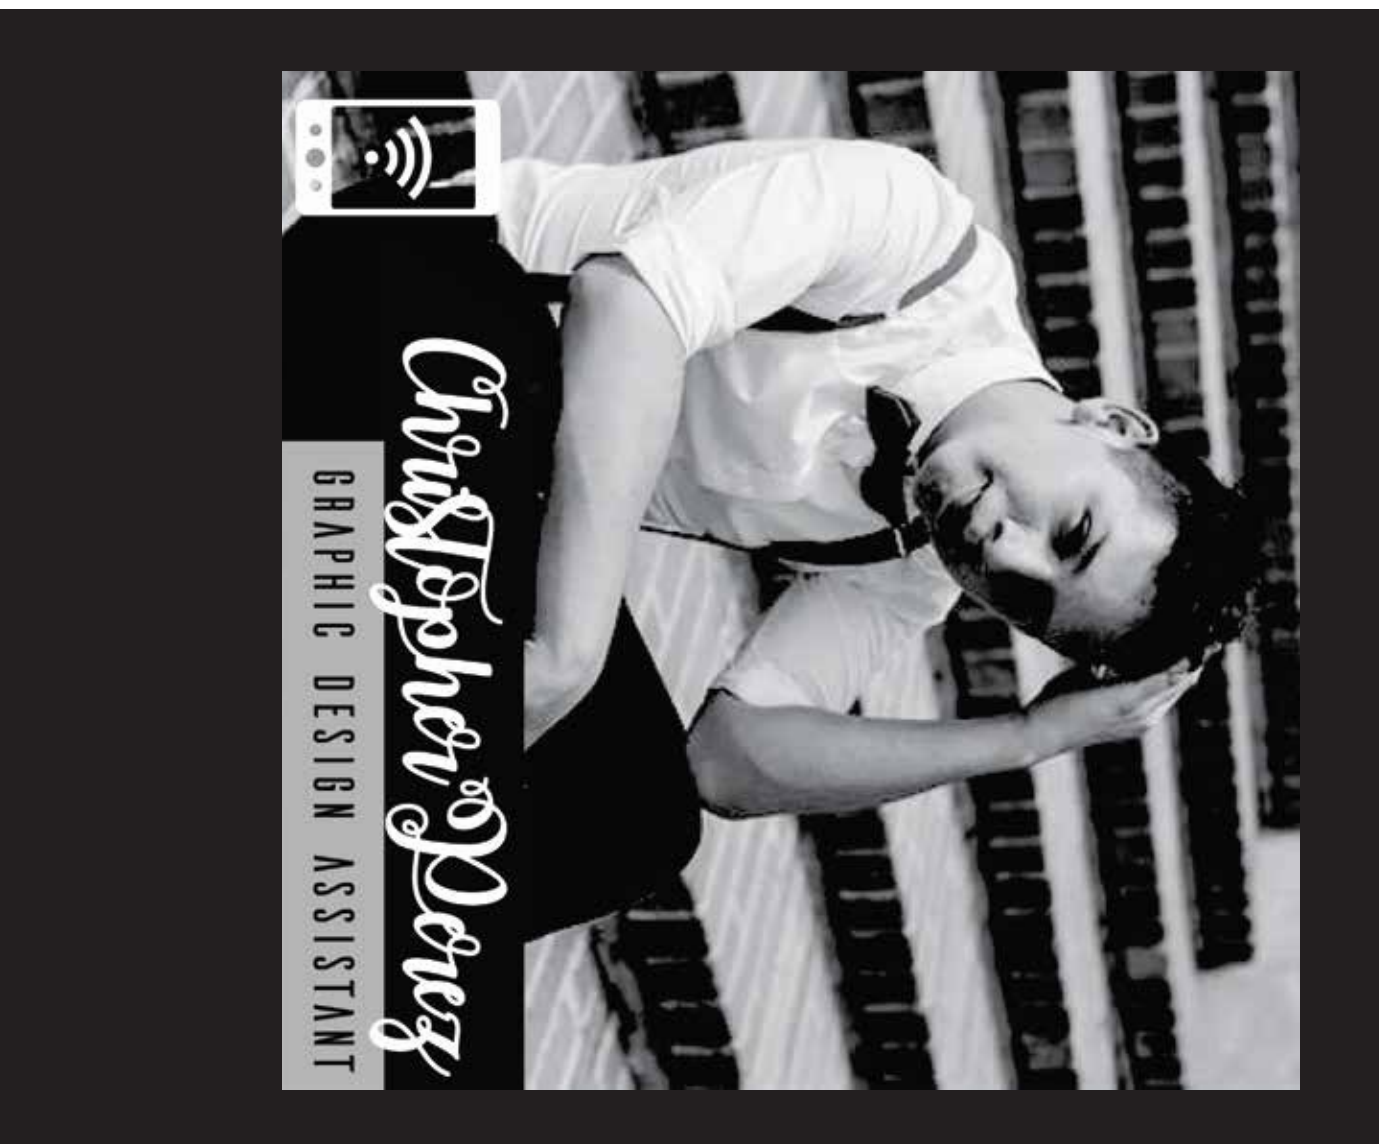

Dear Christopher,

I feel so weird that you've worked on so many graphics but I still haven't met you in person yet!! I guess by the time you read this we will have met. When I first got new subcommittee chairs I was lowkey afraid that nobody would want to work on the infographics because most people haven't even heard of the organizations that they cover or might think the word "infographic" implies "boring and nobody wants to read". But the level of effort you've put into the infographics so far has really amazed me. They're artistically very different from anything I've ever designed and I'm glad you've brought your talents to Circle K because they've made our graphics more stylistically diverse. Also the fact that graphic design is the one way you choose to be involved in Circle K on top of your dance team and other commitments really warms my heart and makes me feel like being Graphic Design Chair is worthwhile.

To Erin

Dear Erin,

At dual board retreat (right after I was appointed as Graphic Design Chair), I was told that my position was cursed and that every past Graphic Design Chair has either resigned or dipped right after their term. But now I know that's not true! I can't thank you enough for getting involved in graphics committee again. GM banners used to take me like 1-2 hours each last quarter and having you work on them has not only made my life easier but also made the GM banners look better (around week 3 when I was using the same template for GM banners Khoa called me out for it but you started doing them soon after lol). I hope you enjoy your last year in Circle K/in college!

To Noah

Dear Noah,

We have such different personalities but I'm glad we were paired for mentorship nonetheless. You're a very kind and considerate person, a lot better than me at making friends and striking up conversation, and you have a lot of qualities I admire. Thanks for hanging with me before/at GM's; I hope we can keep doing regular things together since it's a nice way to keep in touch with each other. I hope you've enjoyed your first quarter in college and it hasn't been too stressful! Let me know if there's anything you ever want to do together whether it be going to an event, visiting a new place, or just grabbing a meal. Hope you have a good break!

with love to
Ryan

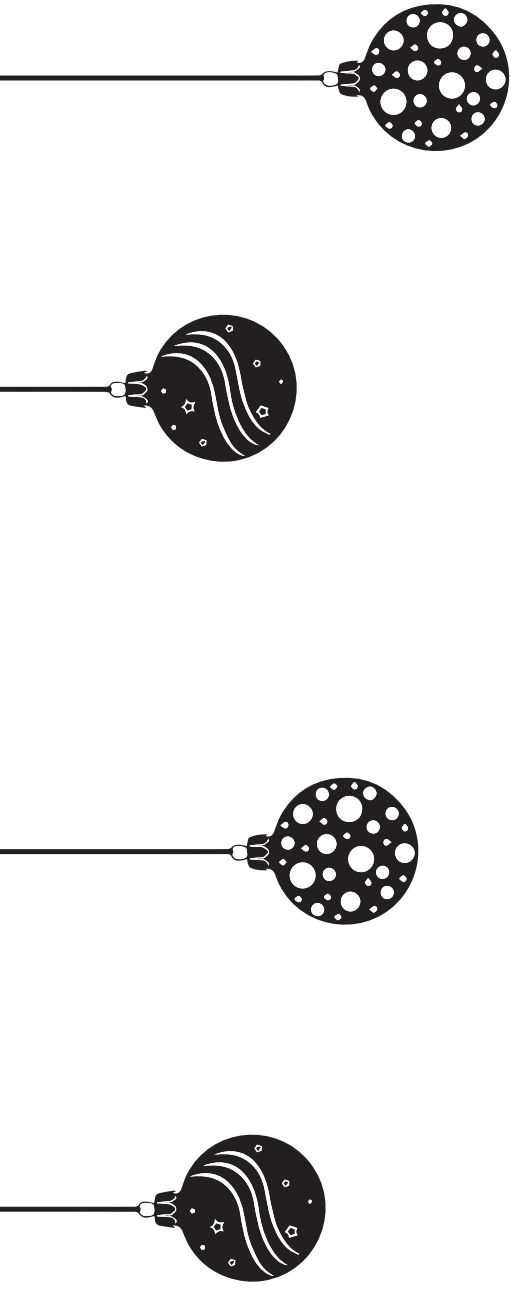

Dear Ryan,

I remember asking you to join my committee several months ago back when you were still at Granite Bay, and you seemed down but I was doubtful it would happen because most people don't end up joining Circle K even if they were involved in Key Club. But it did happen and I'm really glad you've found so many friends in this organization. I see myself in you as a graphics subcommittee chair last year the way you always volunteer to take requests even if they're last minute and how your designs have started from not so good to quickly getting much better (no offense haha) Always feel free to reach out to me for help and advice on anything graphics related or not. Hope your first year is going well!

To Spencer

Dear Spenser,

I was actually kinda worried when I found out one of my mentees was the same year and major as me because I was expecting both to be freshmen, but it all worked out since I've become closer friends with you than I would've thought, and you're pretty much my only friend in physics or 35L (fuck that class). Thanks for helping me with labs and stuff sometimes. Also for hanging with me before G^M's sometimes and complaining about them with me. I hope to spend more time with you and Noah in the coming quarters; let me know if theres ever anything you want to do! Have a good break! Also if you're wondering why I was stalking your FB that one time it's because I was looking for a photo to pout on the left.

To Tiffany

Dear Tiffany,

When I took new subcommittee chairs this year, I really wasn't expecting anyone to be good at graphic design yet, but your first graphic (event template) was way better than what I could come up with at committee meeting! I'm really thankful to have had such talent in my committee this quarter to help lighten the load that comes with all of Circle K's graphics. Don't ever feel bad that you were too busy to work on a graphic I asked you to; tbh there are so many other more important things you could be doing, and it's great to focus more time on those! Always feel free to reach out to me for help and advice on anything graphics related or not. Hope your first year is going well!
